Dear Assembly,

We are happy to report on our progress since our last report and work with the next year’s caucus to transition them into their roles.

**Nucleus Textbook Library**

We have been working to complete a comprehensive textbook list for next year’s caucus so that they are able to start working on the Textbook Library in the Nucleus as soon as they start. We have chosen to focus on first year courses first as these courses are larger and address many students and these are often the classes where textbooks are more heavily utilized. Moving forward, we are excited to build on our relationship with the MSS to hold a textbook drive where alumni and other students are able to donate their old used textbooks that they no longer require. After the textbook drive, we will purchase the remainder of the first year textbooks from the Campus store from previously allocated Academic Science Fund (ASF) money. The front cover of every textbook that belongs to the Nucleus will be painted green and labelled “Property of the Nucleus” to ensure we keep track of these resources. We hope to launch our textbook library by September.

**Sustainability Campaign**

We have been working with Advocacy, External Affairs and MacGreen to bring forward the Sustainability Campaign. The campaign will be happening on March 22 - March 24. You can find us at MUSC tables during these three days talking about food waste management, reducing plastic bottle waste and a shift towards a paperless classroom. I’ve completed the research for food waste management strategies and we are looking forward to having magnets for the events for students!
Transition

Congratulations to Aquino, Preethi, Ryan, Shaarujaa, Kobina and Meg for being elected for next year’s SRA Science! We are excited to work with them on transitioning them into their new roles. I have began to write the transition report and we are looking to have a transition meeting next week where I will be presenting. Some of the things we have discussed for transition is the relationship moving forward with the MSS and how we can align our advocacy efforts, useful contacts, navigating bureaucracy and the work that we have done this year.

Thanks for being a great team! I’m very excited to see what you will all accomplish next because you’re going to do amazing things, no matter where you end up :)

Cheers,

Meg
